

Migrant Equity in OECD Countries

David Scales
Northeastern University

Data Introduction

The Organization for Economic Co-operation and Development is a coalition containing 38 member states, including the U.S., Mexico, Australia, and a majority of the EU.

The organization conducts many efforts into producing publicly available data regarding global trade, economics, health, and in this case, immigration.

This dashboard aims to use this data to enable the user to compare various statistics regarding the lives of foreign-born vs. native-born populations in OECD countries

Mean Foreign Born Household Size for OECD Countries

Data Exploration

This dashboard utilizes several strategies to make it seamless to view and compare relevant data.

The dashboard contains four tabs, each representing a category of data. A sidebar allows countries from the OECD, as well as foreign-born/native-born/both to be selected for comparison. These selections are carried through tabs, as shown in the image on the right

Home Page

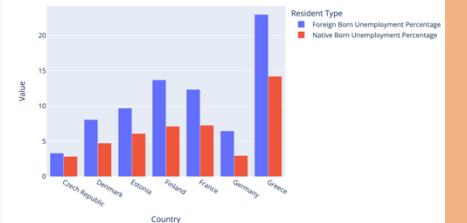

The dashboard's main page features an interactive globe demonstrating various features of foreign-born populations across OECD countries, from the percentage of a population's whole, to mean household size

Employment Data

- Represents unemployment percentage across OECD countries
 - Use the below options to select countries to be included, and resident types
 - Note the inclusion of 'EU Total' and 'OECD Total' in the countries list
- Filter available: Australia, Austria, Belgium, Bulgaria, Canada, Chile, Colombia, Costa Rica, Croatia
